Biogale bell, T. A. Hoge & Company...... As the date for the second annual In-As the date for the second annual In-TELLIGENCER road race draws on the in-terest among both local wheelmen and those from the Ohio and Pennsylvania towns in this section, becomes more pro-nounced. Entries close next Monday evening at 6 o'clock, and, although the entries already in do not number over a dozon, from the inquiries for blanks re-ceived within the past two days it is seen that the number of starters will probably be more than last year, when eighteen faced Starter Jake Loos. Out of town wheelmen should be sare to get their blanks in before Monday evening, as the handicappers will require all of as the handicappers will require all of Toesday to fix the handicaps. For the information of many inquirers it is stated here again that the handicappers stated here again that the handicappers are under no limit in placing handicaps. If, by some stretch of the imagination, they were of the opinion that a certain rider should have a day's start, he would gat it. Riders who have never done fast work on the road should not hastitate to enter this race, as everything will be equalized; the slow men will be given handicaps that will insure everybody being banched at the finish, barring accidents.

ring accidents.

The attention of the wheelmen is called to the prize list above. While it is not yet complete it will be seen that there are some very fine prizes in the lot. The bids for furnishing the first prize, a high grade bicycle, were opened yesterday evening and that of George W. Johnson's Sons was accepted. They are to furnish one of the fine Tribune

Everybody will want to take down that round trip ticket to Atlantic City for nished the INTELLIGENCER by the Pennsylvania lines. Already there have been inquiries as to where this prize will be placed. The prizes, by the way, will not be allotted until all the entries are in. The allottment will be printed in Tuesday's Intrinsioneds. Another prize that will be worked for very hard is the season book donated by the Wheeling Baye Ball Cint; nearly all wheelmen are "fans," you know.

Remember, entries close next Monday

BROOKLYN V-. WHEELING.

The "Natiers" Will Enleavor to Hypno-tize the "Grooms,"

This afternoon at 3:30 o'clock the Island base ball park will contain probably the largest crowd of spectators yot seen over there, not even excepting the monster crowd that saw the afternoon game on the Fourth. Brooklyn's the monster crowd that saw the alter-noon game on the Fourth. Brooklyn's National league team is to play against "Billy" White's Inter-state team and everybody is rooting for a Wheeling victory, "Tolly" Kane will be in the box for the home team and another graduate of the Bellaire "bottoms" will officiate in the box for the visitors—no less a personage than the mighty ess a personage than the mighty "Brickyard" Kennedy, who, like Kane,

"Brickyard" Kennedy, who, like Kane, made his reputation as a member of a Wheeling ball team. Bellaire will be on hand in force, and if Kane gulls out a victory for Wheeling, this is the way the two "K's" will appear in Bellaire eyes: KANE, KENNEDY.

The game will be called promptly at 3:30 p. m. On this occasion ladies will be charged admission. There is no advance in prices; the usual Inter-state scale will be in force.

The teams' batting order will be as follows:

tavis, c. lane, p. ritchard, 1b. Donovan, if. Kalkhoff, sub-

INTER-STATE STITUTION.

Washington May Not Come in and Lima May be Reorganized.

The situation in the Inter-state base ball league is still unsettled. There were no games yesterday. Columbus was scheduled to play at Lima and although the Twins are on the schedule to play at Kenton President Ziegler or-dered them to Wheeling for two games on Saturday. Kenton and Findlay are playing independent dates this week. President Ziegler is working on Wash-President Ziecler is working on Washington, Pa., and in the meantime an effort is being made to reorganize the Lima team and stay in the league. This will succeed or fail to-day. Then, if Washington cannot come in another town must be setured. Toledo, which recently withdrew from the Western league, is apoken of as a likely successor of Lima. Though the prospect is that the Inter-state will wenther this storm as it has done several in the past, in any event Wheeling will still be represented event Wheeling will still be represented in a league for the balance of the pres-ent season. You can "bank" on that.

A WONDERFUL GAME.

McDermott and Dolan Pitched Great Hall at Louisville Yesterday.

Louisvitae, Kv., July 11 .- The prettiest game of ball ever played in this city was to-day's between the Colonels and the Bean-eaters. It was a battle royal for sixteen innings, and had to be royal for sixteen innings, and had to be called on account of darkness, the score standing 2 and 2. In the fourteenth inning McCartby, the first man up, rapped out a corking single to right, which McCreary let get away from him, and Spies got in McCarthy's way. McCarthy slacked up a second and let go his right, litting Spies in the nose, and then went on to third. Spies rushed scross the diamond and tried hard to get at McCarthy, but Umpire McDonali separated them and prevented further trouble. The bleachers began awarming on the diamond, and for awhile it looked as though there might be trouble. McDonald put Spies and McCarthy out of the game.

Pirchers, McDermott and Dolan. Umpire Me

Pittanunon, July 11.—Brooklyn tied the score in the ninth on Shoch's three barger, and Pittaburgh won in the tenth

2:14 trotting.-James L., won second.

third and fourth heats; best time 2:114. Geneva won first heat in 2:144.

Persons who are subject to diarrhoxa Persons who are subject to diarring will find a speedy cure in De Witt's Colic and Choiera Cura. Use no other. It is the best that can be made or that money can procure. It leaves the system in natural condition after its use. We sell it Logan Drug Co., Wheeling, W. Va., B. F. Peabody, Benwood, and Bowie & Co., Bridgeport, O.

Reader, did you ever take Simmons Liver Regulators, the "King of Liver Medicines?" Everybody needs take a liver remedy. It is a sluggish or diseased liver that impairs digestion and causes constitution, when the waste that should be carried off remains in the body and poisons the whole system. That dull, heavy feeling is due to a torpid liver. Billousness, Headache, Maiarla and Indigestion are all liver diseases. Keep the liver sative by an occasional dose of Simmons Liver Regulator and you'll get rid of these troubles, and give tone to the whole system. For a laxative Simmons Liver Regulator is significant than Pills. It does not gripe, nor weaken, but greatly refreshes and strongthons.

Every package has the Red Z stamp on the wrapper. 3. II. Zeilin & Co., Philadelphia.

SHEED BALSING.

An Interesting Experiment by Peaf, Shaw, of Minnesotn-Sixteen Sheep Instead of

Prof. Thomas Shaw, director of the state agricultural experiment station and professor of animal husbandry to

and professor of animal husbandry to the agricultural school, has been making some interesting experiments of late in sincep raising. The usual way of feeding sheep is in natural pasture, and one acre of land will not feed to exceed two sheep ultring the soason, and these sheep will not be kept as well as the sixteen which Prof. Shaw is feeding on the same amount of land.

The plot of land which has been selected for this experiment is situated on the experiment farm at St. Antiony park, and is high prairie land. There is a grayel sub-soil and the land has not been manured for over four years. The six sheep and ten lambs with which the experiment was begun have not been able to keep the pasture eaten so far, and a large additional fock has been put upon the land to assist them. Judging from the prevent prospect, a little less than three acres of land will feed sixty-five sheep and lambs during half of the pasturing season.

Professor Shaw is deeply interested.

feed sixty-five sheep and lambs during half of the pasturing season.

Professor Shaw is deeply interested in the experiment, which, he says, is the fint of his life, and he is very glad to explain his work to any one who is interested. He said to a reporter:

"I have, as you know, always made a specialty of stock raising, and in my investigations have been struck with the fact that a large amount of land was required to raise a few sheep. Now, there is nothing that the farmer can raise than will before a better raise in the quired to raise a few sheep. Now, there is nothing that the farmer can raise that will bring a better price in the market than mutton. The only objection there has been to raising sheep is the fact that it costs so much to feed them properly. I therefore decided if possible to find a plan whereby I could lead more sheep to the sore. How well I have succeeded is shown by the fact that I have succeeded is shown by the fact that I have already raised 309 pounds of that I have already raised 309 pounds of first class lamb on the acre which I am using for my experimenting, and will in all probability obtain 700 pounds by the

all probability obtain 700 pounds by the end of the season.

"My plan is this." he continued. "I divided my acre into four equal parts, each part surrounded by a portable fence. Two of these plots were sown to rye last fall. In the spring, as soon as the rye was well out of the ground, the sheep, six full-grown ones and ten lamb, were turned onto it. As soon as they had eaten the rye well down they were turned into the next plot. While they were eating from this second quarier the first was growing up again from the roots which were left, and by the time the second plot was cleaned off the first one was ready to be eaten for the second time. This was eaten for the second time. This was repeated three times, and when the sheep were on the second plot for the last time the first plot was plowed and sown with a mixture of corn and rape. A drill was used and the seed was planted very thick. After the sheep had caten off the second plot for the third time they were put upon the third one, which had been planted with oats and peas, and the second plot was put into corn and rape. The sheep were unable to eat the fourth plot off put into corn and rape. The sneep were unable to eat the fourth piot off in time to get to the fourth before the feed here was so far grown as to be too tought to be easily eaten, so about lifty other sheep had to be brought in to help them out. When the plot was finally esten the original sheep were turned onto the fourth plot, which had been sown to rape alone, as the ground was very dry. This piece has turned out the best of the lot. By the time that the sheep had obtained all the food possible on the fourth plot, the first was ready for them to eat again, and they were put upon it.

"The corn and rape were well up, and made most excellent feed. As soon as it was eaten clove, a small quantity of sorghum seed was added and the plot harrowed. This plot will be eaten off twice more this season, and no more seeding will be necessary. The second

seeding will be necessary. The second quarter has been handled in the same way, and will be eaten twice more. The third plot has now been eaten twice, and has furnished posture equivalent to and has furnished pasture equivalent to that required for one sleep for 225 days. After the second eating it was sown with rape and sorghum and harrowed, and will be eaten three times more this sum-mer. The fourth plot has been caten off twice, and has furnished food for one sheep for 230 days. It has again been, harrowed without reseeding, and will be pastured off twice more this sea-son.

son.
"We are experimenting with various of "We are experimenting with various other foods, such as a combination of tares and oats and sorghum. We expect better results from sorghum next year than from any other plant we have the tried. We have tried various other foods, but have not as yet found any that will compare with those we are using this year, with the exception of those named."
"Would you when! to automarating the second of the second of

of those named."
"Would you object to enumerating
the good points of your discovery, profossor?" he was asked.
"The strong points of the system are
those," he repired: "First, the production of a very large amount of strictly
first class mutton; second, the complete
removal of all kinds of noxious weeds
from the upper section of the soli: first class mutton; second, the combete from the upper section of the soil; third, the fact that the ground is left in a richer condition at the end of the season than it was at the beginning, for the reason than it was at the beginning, for the reason that the sheep manure it throughly; fourth, the impaction of the spongy prairie soil, caused by the many feet constantly pressing it, which was proved to be surred on the surface to prepare it for the crop to follow, no plowing being necessary; sixth, and perhaps the most important, the good crops that are sure to be produced after land has been pastured in this way. This is due to the various points that I have mentioned the hardening of the ground, the manning and the absence of weeds. It fall to see how the much-dreaded Russian thistle, or any other weed that takes root on the surface, can live through such a discouraging experiment. If there were no other advantages to this plan, it would be worth the attention of the farmers of the north west who wish to have farms free from weeds. "Of course," continued the professor, "I am aware that this is an exceedingly favorable season for my experiments, but even in dry seasons is any convinced that better relative results will be obtained from this system than from any system of grain growns. I haven have a sum of the farmers out the land in a few seasons, but this plan leaves the ground in much better condition than it was before. It might be a good plan to devote on-half of a farm to raising shop in this way and the other half to raising grain, alternation agond the farmers out the land in a few seasons so that part of the farmers of the farmers of the farmers on the farmer of the farmers of from the upper section of the soil; third, the fact that the ground is left in

fact, anywhere in the world. The Engfact, anywhere in the world. The Eng-lish sheep are known everywhere as the best grown, but it will only be a matter of a few years sutil we can show sheep grown in Minnesota that will be able to stand comparison with any that our English neighbors can produce."

A number of farmers interested in sheep raising are avitating the plan of

A number of farmers interested in sheep raising are agitating the plan of having the board of regents of the university, who have charge of the experiment station, obtain a large farm for Professor Shaw's use in carrying out experiments on a larger scale. The professor has expressed his willingness to have his plan tested in any way that the board may see fit.

The experiment now being carried on will be completed about October, and Professor Shaw will then write a pamphlet for free distribution, describing his treatment fully.

All Sorts of Local News and Gossip from the Glass City. Robert Barnes is the name of the man

killed on the railroad near the Glenn coal mines, whose death Coroner Reece Furbay investigated. He was a miner, and had been drinking, and is supposed to have sat down on the ties to rest and fell asieen. His head was mashed, and death must have been instantaneous. He leaves a wife and three children.

The Odd Fellows of this district will-hold an outing at Epworth Park on La-bor Day, September I, and J. W. Heath-erington, of this city, and Joseph Will-iams and John Frazier, of Martin's Ferry, have the matter in charge. A meeting of representatives of all the lodges in the county will be held at Bridgeport on the 20th.

Marshal Bahra and Prosecuting Attorney Weems prepared the necessary papers and forwarded them to Governor McKinley for a requisition for the two thieves who robbed Carter Bros., and who are now in the Wheeling jail. They will be taken before 'Squire Mason here a good as the names arrive, probably as soon as the papers arrive, probably Saturday.
